CSE 6140 Assignment 1

Zhuling Bai

GT Username: zbai35

I finished this assignment by myself. I searched relative things about disjoint sets and minimum spanning tree algorithms on Wikipedia and Stackflow. I also used Python tutorial and networkx documents to finish the programming assignment. It's difficult for me to analysis the time complexity because I have no background in data structure or algorithms. But I think it's fun to programming for a practical problem in which progress you can have a deeper understanding of what you've learned.
